INTRODUCTION.

The map is divided into half kilometre squares originating from Muhammad Ali Square. The distances in each direction are given in the borders of the plates.

Each half kilometre square bears a number printed in red.

The Index to names gives the Plate number and the Square number in which the name is shown.

When compiling the Index a few cases occurred where the name shown on the map did not conform to the official name. The former names are therefore printed in italics between square brackets in the index thus:— Ada El, Fort [*El Atta Fort*].

In order to avoid overcrowding the names in the more congested areas of the city certain buildings have been numbered. These numbers appear in the Index against the appropriate names.

The Key Map facing Plate 1. shows the arrangement and sequence of the plates. It should be noted that in order to reproduce the Atlas in the smallest number of plates the maps have been oriented approximately N.E.

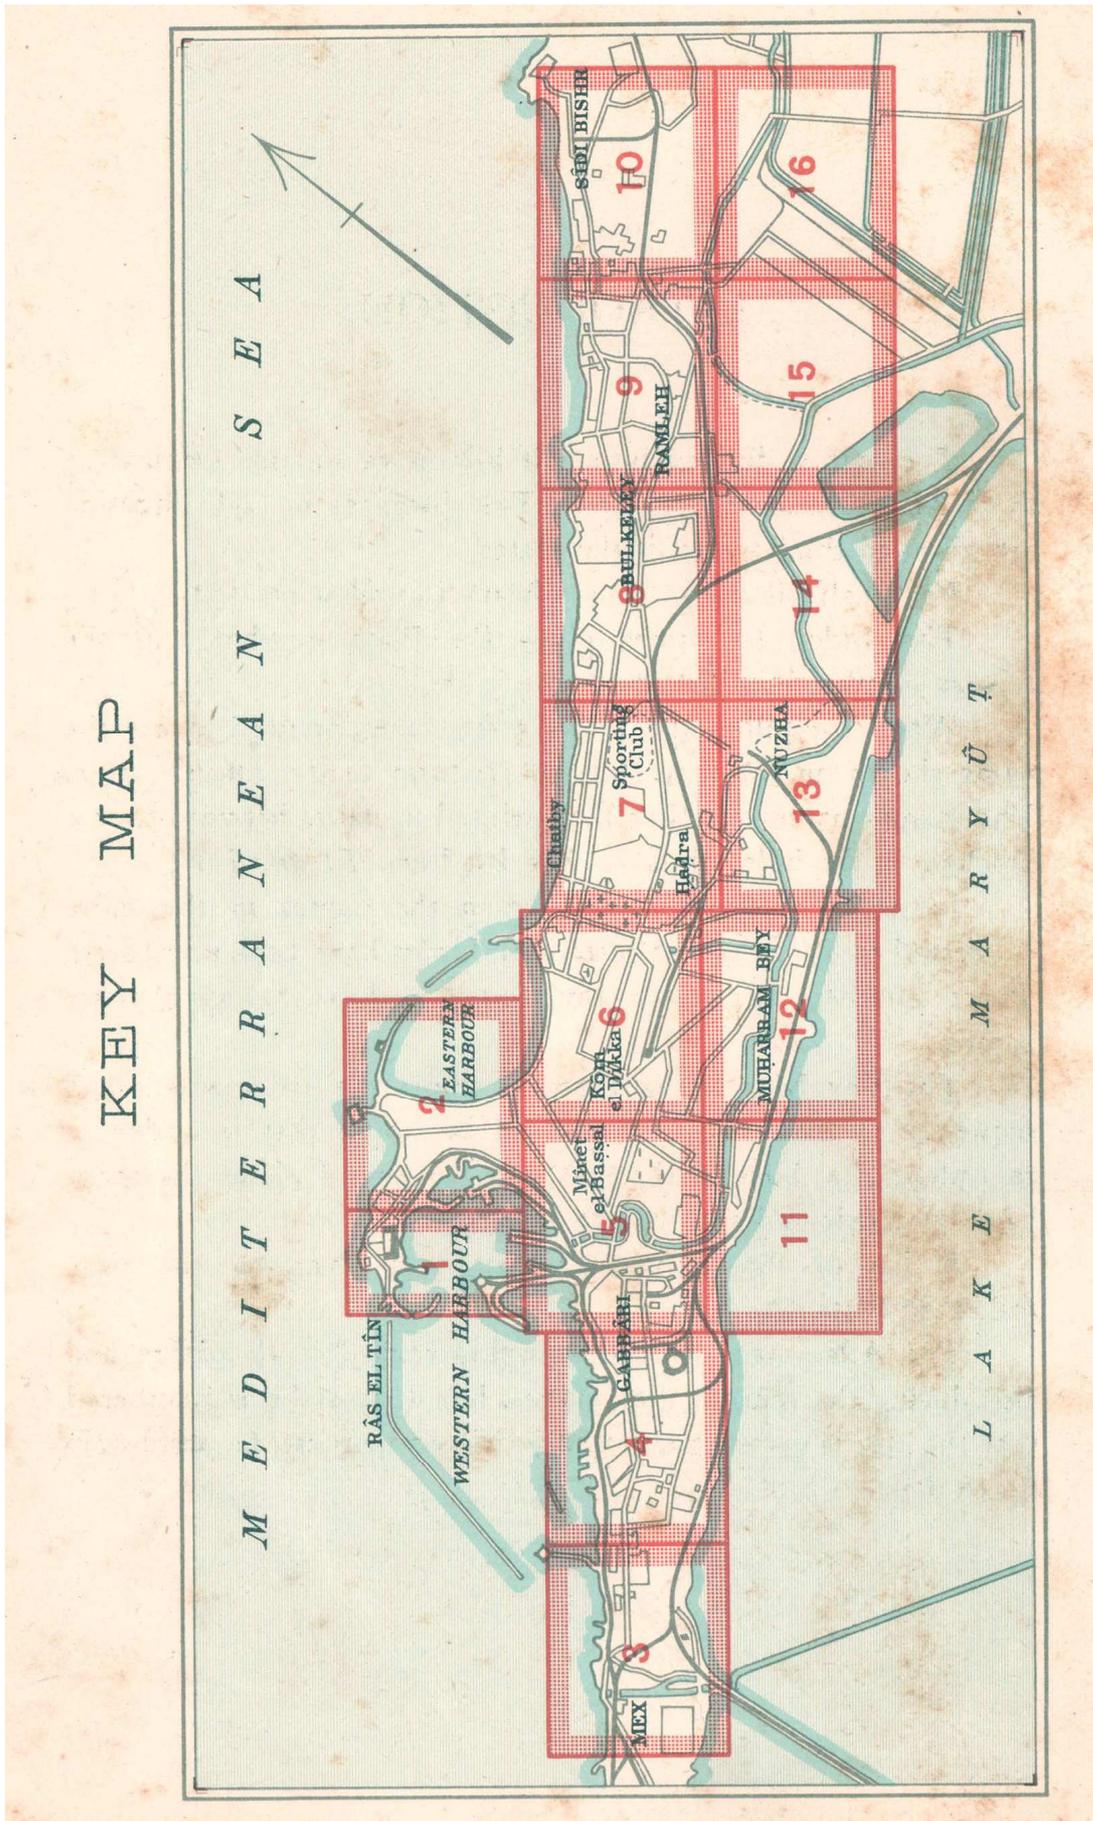

A list of the conventional signs is given on the page following Plate 16.

The Atlas maps were thoroughly revised both before and also during the reproduction stages, but it must be remembered that the city is growing so rapidly that no map can be absolutely up to date.
